

Are you Ready for a Puppy?

Is everyone in your household prepared to help care for the puppy?

Are you able to get the puppy out for potty training at least every 1-2 hours and after meals when you are home?

Are you able to afford the food and veterinary care required for a puppy? Puppies will need booster shots and vaccinations. Puppies need to be fed 2-4 times a day depending on their age.

How do you plan on training the puppy to learn basic manners and obedience?

What would you do if the puppy had an accident in the house?

What would you do if the puppy chewed up your furniture or other personal items? Puppies are very mouthy and will chew a lot of things while they are teething.

Do you own a crate, bed and/or gates for the doorways to keep the puppy comfortable and out of trouble in your absence?
